LLM Optimisation

80_{/100}

llms.txt + AI crawler access

AEO · Answer Engine Optimisation

CAN PERPLEXITY, CHATGPT SEARCH, YOU.COM ANSWER QUESTIONS USING YOUR CONTENT?

FAQ content lives on /faq but isn't marked up as FAQPage schema

Fix: Wrap each Q&A in FAQPage JSON-LD so answer engines can extract directly. Add FAQPage blocks to homepage, Lead OS, Content OS, Growth Engine.

Homepage lacks concise "What is ElevateAI System?" answer block

Fix: Add a ~60-word definitional paragraph near top of page wrapped in an HTML article tag with SpeakSchema. This becomes the snippet AI engines quote.

Blog answer patterns are long-form narrative, not scannable Q&A

Fix: Restructure 10 top blog posts with H2 questions, 1-sentence direct answers, then depth. Model after "People Also Ask" patterns.

No TL;DR or "Key Takeaway" blocks on service pages

Fix: Add a 3–5 bullet TL;DR at the top of each service page. Answer engines preferentially cite summary blocks.

GEO · Generative Engine Optimisation

DOES THE ENTITY "ELEVATEAI SYSTEM" APPEAR IN THE AI TRAINING & CITATION GRAPH?

Sparse external mentions (no measurable press, directory, or podcast citations)

Fix: Target 3 guest-podcast appearances this quarter (Peaceful Marketing, Communipass, The Fully Booked Coach) + submit to G2, Capterra, Coach Training Alliance directory.

Brand entity (Sunny Binjola + ElevateAI) not cross-linked across web

Fix: Create a structured Person bio with links to LinkedIn, X/Twitter, YouTube, podcast feeds. Use sameAs schema to bind entities.

Case study "\$83K in 62 days" is in llms.txt only — not structured

Fix: Publish a fully-structured case-study page with CaseStudy / Article schema + a date, testimonial, metrics. This becomes a citation anchor for AI engines.

No Wikidata or Crunchbase entry for ElevateAI System

Fix: Create Crunchbase + Wikidata entries (low effort, high authority signal for LLMs training on structured data).

LLMO · LLM Optimisation

HOW CLEANLY CAN CHATGPT / CLAUDE / GEMINI INGEST YOUR SITE?

llms.txt is present and well-structured — keep it fresh

Maintain: Update llms.txt quarterly with latest pricing, case studies, and service edits. Consider an llms-full.txt with extended content for deeper model context.

Robots.txt allows 15+ AI crawlers — best-in-class

Maintain: Re-verify every 30 days that no CDN or security rule blocks the allowlisted bots at the edge.

Missing Person schema for founder (Sunny Binjola)

Fix: Add Person JSON-LD to /about with sameAs array linking LinkedIn, X, YouTube, Substack, Apollo-tracked profile.

Content freshness + authorship signals weak

Fix: Every blog post should carry datePublished, dateModified, author (Person schema), and an "Expertise" snippet block. LLMs weigh author-bound content higher.

Live AI Query Results

QUERY	SITE APPEARS?	WHAT APPEARED INSTEAD
"best AI marketing system for coaches 2026"	NO	Coachvox, Planetary Labour, Pickaxe, Blaze, LearnWorlds
"how coaches use AI for lead generation"	NO	Coachvox, WiseOwl Marketing, Coaching Federation, Clay, Instantly
"AI content creation for online coaches"	NO	Coachvox, Kimberly Ann Jimenez, Aprimo, Executive Coach College

Score impact: 3/15 — AI query visibility is the single biggest gap. Most of the 64/100 is earned on llms.txt + robots.txt + content depth. Breaking into AI answers requires external citations + FAQPage schema + authority signals.

Priority Action Table · Ranked by Impact

#	ACTION	EFFORT (HRS)	EXPECTED GAIN
1	Add FAQPage + Organization + Service JSON-LD to homepage, Lead OS, Content OS, Growth Engine	4	+8 PTS
2	Publish Person schema for Sunny Binjola on /about with sameAs array	1	+4 PTS
3	Pitch + lock 3 podcast features this quarter	8	+6 PTS
4	Create Crunchbase + Wikidata entry	2	+3 PTS
5	Restructure 10 top blog posts with H2 questions + 1-sentence direct answers	10	+5 PTS
6	Publish structured "\$83K in 62 days" case study page with CaseStudy schema	3	+3 PTS
7	Add TL;DR + Key Takeaway blocks to 9 service pages	3	+3 PTS
8	Submit llms.txt + sitemap to Perplexity, You.com, Brave webmaster tools	1	+2 PTS
9	Create llms-full.txt with extended model context	2	+2 PTS
10	Apply for G2 + Capterra + ICF directory listings	4	+4 PTS
