how ChatGPT chooses who to recommend	MED	Medium	Blog ranks	HIGH	YES
AI marketing for executive coaches	MED	Medium	Niche page exists	MED	NO

► Rank These First · 3 Quick-Win Keywords

01 "AEO for coaches" / "Answer Engine Optimisation for coaching business"

Build one definitive 2,500-word pillar page; add FAQPage schema with 8–10 Q&As; cross-link from every niche page.

02 "LLMO guide for coaches"

Expand existing "What Is LLMO?" post into a 3,000-word definitive guide with a TOC, diagrams, and Person schema byline.

03 "AI marketing trained on your voice for coaches"

Already on the homepage — add meta description + FAQPage schema + Service schema to capture SERP real estate.

△ Build Towards These · 3 Longer-Term Targets

01 "AI marketing system for coaches"

Dominated by Coachvox & Blaze — needs 3–6 months of topical authority + backlinks to compete.

02 "AI lead generation for coaches"

Lead OS page is close but needs external citations and a case-study flywheel to break top 10.

03 "AI content creation for coaches"

Content OS should spawn a supporting cluster of 8–10 subtopic posts + embedded video walkthroughs.

Top 5 Issues

CRITICAL

Meta descriptions still missing on homepage, Lead OS, Content OS, Growth Engine

Fix: write 155–160-character meta descriptions for all 9 core pages before next Thursday. This is the 2nd consecutive week flagged — CTR is leaking and AI snippet eligibility is capped.

CRITICAL

Zero schema markup detected on homepage or core service pages

Fix: add Organization + Service + FAQPage + Person (founder) JSON-LD to homepage, Lead OS, Content OS. Biggest unlocker for rich results.

HIGH

Site does not appear in any of the 3 AI-simulation queries

Fix: build FAQPage schema + external citations (Gartner-style mentions, podcast features, directory listings) so LLMs surface the brand.

HIGH

No visible breadcrumb or structured navigation beyond top nav

Fix: add BreadcrumbList schema + visible breadcrumb component on every /niches and /vs page.

MEDIUM

28 /niches pages risk thin-content classification without unique testimonials

Fix: add one niche-specific testimonial, one stat, and one case-study snippet per niche page to pass E-E-A-T thresholds.

Top 3 Wins

WIN

AI-inclusive robots.txt + well-structured llms.txt combo

Best-in-class discoverability setup; 15+ AI crawlers explicitly allowed, llms.txt cleanly describes services, pricing, and differentiators.

WIN

38 indexed blog posts with daily publishing cadence

3 new posts this week (Apr 16, 17, 18) on recommended high-intent topics — cadence signal is excellent.

WIN

90-URL sitemap with niche + comparison page coverage

28 niche pages + 3 vs-competitor pages (HubSpot, Coachvox, DIY) create strong long-tail + comparison-intent capture.

90-Day Priority Action Plan

- 1 Write + deploy meta descriptions on all 9 core pages (this week).
 - 2 Add Organization + Service + FAQPage + Person JSON-LD schema to homepage & Lead OS (this week).
 - 3 Build an "AEO for coaches" pillar page (2,500+ words, FAQPage schema).
 - 4 Expand "What is LLMO?" blog into a 3,000-word definitive guide with Person schema byline.
 - 5 Add 1 testimonial + 1 stat + 1 case snippet to each of the 28 /niches pages.
 - 6 Pitch + secure 3 external podcast features (Peaceful Marketing, Communipass, The Fully Booked Coach).
 - 7 Launch BreadcrumbList schema + visible breadcrumbs site-wide.
 - 8 Create a 10-post topical cluster around "AI content system for coaches" linking to Content OS.
 - 9 Submit llms.txt + sitemap to Perplexity, You.com, and Brave Search via webmaster channels.
 - 10 Instrument GSC monthly rank tracking for the 10 target keywords above; review week-over-week in this report.
-
