### ► Rank These First · 3 Quick-Win Keywords

#### 01 "somatic healing for men after breakup"

Still unowned after being flagged last week. Publish the promised 2,000-word pillar with H2 questions, embedded videos, and FAQPage schema.

#### 02 "nervous system regulation after breakup"

Blog post exists but lacks meta description + schema. Ship Article schema + optimised meta + 5 internal links from niche recovery pages.

#### 03 "men's emotional embodiment coach"

Brand-aligned but no dedicated page. Create /men-emotional-embodiment-coach landing page with Person schema + 8 FAQ.

### △ Build Towards These · 3 Longer-Term Targets

#### 01 "men's life coach"

High volume but dominated by BetterMen, Man-Up! — compete via narrow positioning on "heartbreak + embodiment" instead of generic.

#### 02 "how to heal after a breakup as a man"

Pillar exists; needs backlinks from 3+ men's-work podcasts and guest-post placements.

#### 03 "no contact rule for men"

Break out into a standalone 2,500-word definitive guide; this is the #1 high-intent query in the niche.

# Top 5 Issues

---

## CRITICAL

### Meta descriptions still missing on homepage, /blog, /heal-your-heartbreak

Fix: 155-character meta descriptions for the 10 top pages this week. Flagged 2 weeks running.

## CRITICAL

### Site absent from all 3 AI-simulation queries — zero visibility in AI answers

Fix: FAQPage + Person schema + 2 podcast citations before next audit.

## HIGH

### No schema markup on key pillar or programmatic pages

Fix: Add Article / FAQPage / Course / Person schema to /heal-your-heartbreak, /blog, and 5 top programmatic pages.

## HIGH

### 23 programmatic recovery pages lack unique testimonials / dates

Fix: add 1 unique testimonial, 1 stat, and datePublished per page to pass thin-content signals.

## MEDIUM

### Blog cadence slipping — last major update April 3

Fix: target weekly publishing cadence; publish 2 new pillar posts before next Thursday.

# Top 3 Wins

---

## WIN

## WIN

### **4,500-word /heal-your-heartbreak pillar with 13 FAQ Q&As**

Strong content depth; only needs schema wrap-up to compete for featured snippets.

## WIN

### **Robots.txt + llms.txt combo with 7 AI crawlers allowed**

Discovery setup is solid — Applebot-Extended added this cycle is a notable extra vs competitors.
