The AI Systems Playbook

The 3-Layer Framework Every Coaching
Business Needs to Scale with AI

By Sunny Binjola | elevateaisystem.com

For coaches ready to build systems, not just content.

You Don't Have a Lead Problem. You Have a Systems Problem.

You've built something real. You have clients. You have expertise.
But your business runs on hustle, not infrastructure.

You're posting without a capture system. Leads come in
but you don't know who's warm and who's wasting your time.
Follow-up happens when you remember — which means it
often doesn't happen at all.

This isn't a content problem. It's not a marketing problem.
It's a systems problem.

This playbook gives you the framework — the exact 3-layer
architecture that separates coaches who scale from coaches
who stay stuck doing everything manually.

Who this is for:

Coaches, consultants, and creators with real offers and real clients —
who are ready to stop duct-taping and start building.

3 Layers. One Integrated System.

Every coaching business that scales sustainably has the same three layers in place — whether they know it or not.

Most coaches are missing at least two of them.

Each layer feeds the next. Without Capture, there's nothing to Track.

Without Tracking, there's no context to Convert. The system is the strategy.

LAYER 1

Capture

LAYER 1: CAPTURE

Stop Creating Content. Start Creating Capture Points.

Most coaches are producing content with no mechanism to turn attention into a relationship. A post gets likes. A video gets views. Then nothing happens.

Capture means building assets that do two things at once: give value AND collect data. The person gets something useful. You get context about who they are and what they need.

What Good Capture Looks Like:

- **Quiz or Assessment**
"What's your lead generation score?" — interactive, shareable, data-rich.
- **Lead Magnet with Depth**
Not a generic PDF. A framework, a diagnostic, a tool they actually use.
- **Micro-Commitment CTA**
"Book a 15-min clarity call" instead of "Buy my \$5K program."
- **Content-to-Capture Bridge**
Every post ends with a path. Every video has a next step. No dead ends.

The Litmus Test:

If someone consumes your content and has no way to raise their hand, you don't have a marketing system. You have a hobby.

LAYER 2

Track

Every Lead is a Person. Treat Them Like One.

Someone fills out your quiz. Someone DMs you. Someone downloads your guide. Now what?

Without a tracking layer, every conversation starts from zero. You don't know what they've seen, what they need, or how close they are to buying. You're guessing. And it shows.

The tracking layer gives you context — and context is what turns a cold follow-up into a warm conversation.

Your Tracking System Should Answer:

- Who just entered my world — and how?
- What do they need right now?
- How warm are they — are they browsing or ready to buy?
- What have they already seen or engaged with?
- When was the last touchpoint, and what should the next one be?

WITHOUT TRACKING

- x Leads fall through the cracks
- x Every call starts from zero
- x Follow-up is random
- x You forget who's who

WITH TRACKING

- Full context on every person
- Prioritized by readiness
- Automated + timely follow-up
- Nothing gets lost

LAYER 3

Convert

LAYER 3: CONVERT

Nurture Isn't Nagging. It's Guiding People to a Decision.

People show interest and then disappear. Not because they weren't ready, but because nothing guided them forward.

The conversion layer isn't about pushing harder. It's about building a sequence of touchpoints that feel natural, personal, and well-timed.

When someone enters your world, they should experience a path — not a void.

The Conversion Stack:

- **Welcome Sequence**
First 48 hours after capture. Deliver value, set expectations, introduce your philosophy.
- **Nurture Sequence**
Weeks 1-4. Case studies, frameworks, and insights that build trust over time.
- **Re-engagement**
For people who go quiet. A gentle, relevant nudge — not a guilt trip.
- **Decision Trigger**
When the data says they're warm, invite them to a call. Not before.

The Key Insight:

Conversion isn't about closing. It's about creating conditions where the right people close themselves.

PUTTING IT TOGETHER

Your 90-Day Roadmap

Here's the order. Don't skip ahead.

WEEKS 1-2

Audit & Foundation

- ☐ Map your current lead flow end to end
- ☐ Identify where leads drop off
- ☐ Choose your CRM and set up the pipeline
- ☐ Define your ideal client profile with specifics

WEEKS 3-5

Build the Capture Layer

- ☐ Create one high-value lead asset (quiz or assessment)
- ☐ Build the landing page with a clear CTA
- ☐ Connect every piece of content to the capture point
- ☐ Test the full flow from content to capture to CRM

WEEKS 6-8

Build the Tracking Layer

- ☐ Set up lead scoring based on engagement
- ☐ Create tags and segments for different lead types
- ☐ Build a dashboard showing pipeline health
- ☐ Establish a weekly 15-minute pipeline review habit

WEEKS 9-12

Build the Conversion Layer

- ☐ Write your welcome sequence (3-5 emails)
- ☐ Write your nurture sequence (4-6 emails)
- ☐ Set up re-engagement triggers for quiet leads
- ☐ Launch, test, and optimize based on real data

WHAT'S NEXT

Ready to Stop Reading and Start Building?

The AI Systems Audit is a deep diagnostic of your coaching business — every system, every gap, every opportunity. You'll walk away with a prioritized roadmap.
